TO THE MEMBERS OF THE CHARTIST CO-OPERATIVE LAND ASSOCIATION.

My DEAR FRIENDS,-No General, in addressin his troops upon the eve of a sanguinary conflict with their fellow-men about some baubled privilege of their oppressors, ever felt half that pride that I shall feel in addressing you in the Carpenters' Hall on Sunday night, the 12th of April, upon the eve of England's regeneration. I am glad to find that a delegate meeting has been called, to assemble at Manchester on that day. I propose making one of the tea party on Good Friday, in Carpenters' Hall; and after the ballot on Monday I will address the people of Oldham in their hall. On the whole, next Easter week ought to be the proudest Easter holidays that ever the Lancashire men spent. You will see, by Wednesday's Summary, that I was offered, as a first bid, £2,000 for the land that cost us £1,860. brothers of the Executive invite their attendance during the time of taking the ballot in Carpenters' the working men is conducted.

Some persons who hate Chartism, nevertheless use the Land project as an argument to prove that it would destroy Chartism. I now tell you what every man in England knows, that had it not been for the Land project, Chartism would have been dead, and the people sold irrevocably to their oppressors. They tried preaching, exclusive dealing, speaking, turn-outs, and many other experiments which the poor who work were told was Chartism; but the Chartist mind of the house of bondage, and it only required to have the sure road pointed out, to follow it.

But there is one subject of a negative character, which I have before mentioned, and to which I shall again draw your attention ; I mean the insertion of such conditions in each lease as will prevent our new-born moral society relapsing into the filth, depravity, and roguery which now characterise society. I mean, that there shall be an express clause against leasing or selling to a banker, a parson, a distiller, a brewer, a pawnbroker, or for the purpose of carrying on the business of selling spirits or malt drink, or leasing to any person practising in any department in the legal profession. This latter condition may appear strange when we have a solicitor for our treasurer; but we must bear in mind that he our rules upon exceptions.

ADDRESS OF THE POLISH COMMITTEE TO THE BRITISH NATION.

Poland is again in arms ! The struggle against the invaders of our land, against the oppressors of our liberties and persecutors of our consciences, has begun anew. Separated from our homes by seas and by hostile lands, unable at this moment to share the efforts and the dangers of our brethren, can we remain indifferent and silent to their appeal ? Have we no duty to perform

at the present crisis ? To you, people of this realm, we owe the deepest gratitude for the shelter and hospitality which you have afforded us. History will de justice to you in handing down to the respect of posterity your generosity towards

But to Poland we owe our last drop of blood; and we are ready to shed it for her defence. Duty, shonour, patriotism, and all that is held sacred and honourable amongst men, bind us to serve her-to serve her to the utmost-to serve her according to our peculiar position. On her behalf, therefore, we appeal to you.

The wrongs of our country are not of recent-date. tion :---

Poland, a free and independent country, which has rendered essential services to Christendom and civilisation -the land of Sobieski, Kosciuski, and Copernicus, that was, in1772, invaded by three neighbouring powers (Russia, Prussia, and Austria), who had leagued themselves against her for the destruction of her political existence. Prince Adam Czartoryski had arrived at Brussels This infamous act was finally accomplished in 1795, by he partition of Poland.

Since that period up to the present day the history of the Polish people presents but one chain of unccasing efforts, sacrifices, and sufferings. Alas! all unprofitable.

STATE OF TRADE IN BRABFORD, --- Every day adds to the appalling wretchedness and misery of the working classes of this town. Hundreds are being turned off from their employment. Meeting after meeting of the unemployed have been holden, but nothing, it appears, can or will be done to relieve the forlorn condition of the unwilling idlers, while the beautiful embellishments of the warehouses and the splendid equipage of the mill-lords mock the misery of the unhappy working class.

LEAMINGTON .- The cordwainers of this town Have adopted the following resolution :-- "That we, the cordwainers of Learnington, in general meeting assembled, do consider the old trade of Glasgow have acted an unmanly Chartists of London have already exhibited the best part in uniting with the masters to defeat and deprive union members of their work ; and we consider the Liver. taken up this important question. A committee has pool body, and a few of the men of London, to be equally culpable for aiding them. We record our censure upon those parties, and for the future will relieve no old cards, for we consider, until the cordwainers are united in one thoroughly democratic character, which, if followed up general union, they will never obtain their fair share of the wealth they produce. 1994 B

THE TURN-OUT IN THE BUILDING TRADE .- There appears to be every reason to expect a turn-out among all the men engaged in the building trade in this part of the kingdom. At Birkenhead the joiners and masons are all out, and the extensive works at that place are at present brought to a stand-still. At Manchester there is also a very general turn-out amongst the men engaged in the same description of business, and there is no reason to hope that we shall escape at Liverpool. The men have certainly chosen their own time well, for there never was so great a demand for workmen employed in building. The masters, however, appear to be very resolute in refusing their demands .--- Liverpool Times.

THE STRIKE OF THE JOINERS AND BRICELAYERS, IN MANCHESTER .--- In consequence of the slaters, plumbers, glaziers, plasterers, and painters, with their labourers, having been called upon for levies in support of the turn-

outs in the other branches of the builing trades, to which calls they had responded, the master builders of Manchester have felt obliged, in order to bring the struggle to a eedy termination, to suspend building operations entirely; and since Saturday evening, the 7th instant, the whole of the men employed in the building trades have been out of employment. The joiners and carpenters, together with the masons, some time since obtained a reduction in the hours of labour, having been permitted to leave off work at noon on Saturdays, and to resume employment at seven o'c ock on Mondays, instead of six, as on every other day of the week. The demand now made is for 3s. per week extra wages. The masters have offered 2s. extra per week, if the men will return to their old hours : this has been refused .- Liverpool Times.

The preamble declares, that it is necessary (the expression "expedient" is omitted) for the preserve tion of health and morals, to regulate night labour in all factories where bobbin-net or warp-lace machinery is employed or worked for making lace or any other fabric. It is proposed that night labour shall cease, and that the machinery shall not commence working earlier than six o'clock in the morning, nor work later than ton o'clock at night, subject to fines and penalties, which are se forth. The first penalty is to be 50%, and others of 100%. Children under eight years old are not to be employed, and children and young persons are not to be employed in the factories beyond the time already mentioned. Some of the other provisions are for the carrying the act into force, and Mr. Duncombe has considered it necessary to annex penalties for disobedience of the enactments. It is provided by the 15th section, that a number of persons shall not act as justices under the act-it has a very sweeping tendency, " That no justice of the peace being a proprietor, owner, or holder of the bobbin-net or warplace machines, or receiving any emolument from the making of any articles on the said machinery, or the father, or the son, or the brother, or the uncle, or the cousin of any such person, shall act as justice under this act." The measure, which is to extend to England and Wales, contains an improved provision for its operationa new feature in acts of Parliament-it is not to commence till the expiration of one calendar month after the day of passing. THE BELFAST SHOEMAKEBS .- MEETING AT HALIFAX. -A public meeting of the trades was held on Monday evening last, in the Working Man's Hall, Halifax, to take into consideration the case of the operative shoemakers of Belfast, to enlist the sympathy of the trades in their favour, and give that pecuniary assistance necessary to enable them to withstand the tyrannical project of the masters to break up the union and lay labour prostrate in the dust. Mr. Beaumont, shoemaker, was called to the chair. Mr. W. Wallace, shoemaker, moved the first resolution, and explained the conduct of masters and the situation of the men, and called upon his fellow-workmen to come forward and render them all the assistance in their power. Mr. Furniss, shoemaker, seconded the resolution, which was supported by Mr. B. Rushton, handloom weaver, and carried unanimously. Mr. Webber, woolcomber, moved the second resolution, and called upon the working men to be united. Seconded by Mr. Swallow, skoemaker, and ably supported by Mr. Baldwin, woolcomber. Carried unanimously. Mr. Evans, shoemaker, moved the third resolution, which was seseconded by Mr. Smith, shoemaker. Carried unanimously. Mr. Crossland, handloom weaver, moved the fourth resolution, which was seconded by Mr. Birtwhistle. and carried unanimously. Thanks were given to the chairman, and the meeting separated. LANCASHIRE MINERS .--- The next general delegate meetng of Lancashire miners will be held, on Monday, 23rd of March, at the house of Mr. John Speakman, sign of the Millstone, Pickley-green, near Leigh ; chair to be taken at eleven o'clock in the forenoon. There will also be a public meeting which will be addressed by W. P. Roberts, Esq., and several of the agents of the Miners' Association, The miners of Bolton and its vicinity are still out, with little or no appearance of an amicable arrangement of the matters in dispute; it has, however, been ascertained that there is a determination existing on the part of some of the coal proprietors to break up the Miners' Union. Will the various trades look tamely on while such nefarious villany is in contemplation ? Shall the miners battle alone and single-handed in thwarting the designs of unprincipled employers ? If so, let the trades look to it, they will follow in the wake of the miners. Members of trades' unions, fly to the rescue! Upwards of 1400 miners are now fighting your battle as well as their own. They do not despair, but they want you to sympathise with them, and render them all the assistance you can. Their demands from their late employers are not exorbitant-they only asked for 4s. per day; they did not strike; they were driven from their employment, and to the men, who have been brought to fill their places, 4s. 6d. per day with refreshments are given. Does not this fact speak volumes, and show clearly that trades' unions are dreaded by the unprincipled portion of employers in every trade? Hence the attack upon the Miners' Union, by disdischarging from their employ unwards of 1400 of its members, at a time, too, when there was a steady demand for coal, at an advance to the public of upwards of 3s. very severely; many of them have been driven out of their miserable homes, and for aught their oppressors cared, might have died in the fields or on the roads. Trades' and there will be little fear but they will yet triumph. Let England and the liberty and civilisation of Europe, unite in expressing their wish for the success of the Pclish people who have taken up arms to regain their rights, and Poland must be victorious. Should she fail now, still you will have the satisfaction to think that you have not forsaken her. But. if she has risen, as we earnestly hope and believe, to fall no more, the last cannon fired upon the retreating invader of our country, will announce a perfect peace to Europe ; and Poland will resume her former place amongst free and civilised nations.

> CORNS AND BUNIONS. PAUL'S EVERY MAN'S FRIEND.

Patronised by the Royal Family, Nobility, &c. PAUL'S EVERY MAN'S FRIEND is a sure and speedy cure for those severe annoyances without the least pain or inconvenience. Unlike all other remedics for Corns, its operation is such as to render the cutting of Corns altogether unnecessary (indeed, we may say, that the practice of cutting Corns is at all times highly dangerous, and has been frequently attended with la. mentable consequences, besides its liability to increase their growth). It adheres with the most gentle pressure, producing an instant and delightful relief from torture ; and, with perseverance in its application, entirely eradi. cates the most inverate Corns and Bunions.

TESTIMONIALS EXTRAORDINARY.

at the Aldersgate School of Medicine.

Dr. Cummins presents his compliments to Mr. Paul. and begs to inform him that his EVERY MAN'S FRIEND has entirely taken away both his corns, and he has re. commeded it ito several of his friends and patients, and in no one instance has it failed eradicating both corns and bunions.

From Dr. Ley, Midwifery Lecturer at St. Bartholomen's Hospital.

Dr. Ley presents his compliments to Mr. Paul, and bega to inform him that his corn plaster has taken away his corns.

Testimonials have been received from upwards of one hundred Physicians and Surgeons of the greatest eminence, as well as from many officers of both Army and Navy, and nearly one thousand private letters from the gentry in town and country, speaking in high terms of this valuable remedy.

Prepared by John Fox, in boxes at 1s. 14d, or three small boxes in one, for 2s. 9d.; and to be had, with full directions for use, of C. King, 40, Napier-street, Hoxton, New Town, Loudon; and all wholesale and retail Medicine vendors in Town and Country. The Genuine has the name of John Fox on the Stamp. A 2s. 9d. box cures the most obdurate Corns.

CAUTION!-Unprincipled individuals prepare the most spurious compounds under the same names; they copy the labels, bills, advertisements, and testimonials of the original Messrs. Howard and Thomas's Succedaneum. It is, therefore, highly necessary to see that the words "Howard and Thomas" are on the wrapper of each article. All others are fraudulent imitations.

LOSS OF TEETH. Messrs. Howard and Thomas continue to supply the loss of teeth without springs or wires upon their new system of self-ADHESION, which has procured them such universal approbation, and is recommended by numerous physicians and surgeons as being the most ingenious sys- tem of supplying artificial teeth kitherto invented. They adapt themselves over the most tender guns, or remain- ing stumps, without causing the least pain, rendering the operation of extracting quite unnecessary. They are so fixed as to fasten any loose teeth where the guns have shrunk from the use of calomel or other causes. They also beg to invite those not liking to undergo any painful operation, as practised by most members of the profes- sion, to inspect their painless yet effective system ; and in order that their improvements may be within the reach of the most economical, they will continue the same moderate charges. Messrs Howard, and Thomas, Surgeon-Dentists, \$t, Berners-street, Oxford-street, London. At home from ten till four. LOSS OF TEETH. Messrs. Howard and Thomas continue to supply the loss of teeth without springs or wires upon their new system of sEFFADHESTON, which has procured them such universal approbation, and is recommended by numerous physicians and surgeons as being the most ingenious system of supplying artificial teeth hitherto invented. They adapt themselves over the most tender gums, or remaining stumps, without causing the least pain, rendering the operation of extracting quite unnecessary. They are so fixed as to fasten any loose teeth where the gums have shrunk from the use of calomel or other causes. They also beg to invite those not liking to undergo any painful operation, as practised by most members of the profession, to inspect their painless yet effective system ; and is order that their improvements may be within the reachof the most economical, they will continue the same moderate charges. #### Also, just published THE BARON'S YULE FEAST. A Christmas Rhyme. In Four Cantos.

(One Vol., 55.) "There is a rough earnestness, both in its thoughts and verse, which is strictly in accordance with the genius of our ballad minstrelsy. If it does not show, in point of ability, an advance on the author's previous produc tions, it yet shows that he can change his hand without loss of power."-The Britannia.

"Mr. Cooper appears to much greater advantage in this seasonable poem than he did in his more ambition attempt of " The Purgatory of Suicides." " The Baron's Yule Feast" has a genial spirit, various subjects, and a popular animated style. The poem is the best of Mr. Cooper's productions."-Spectator.

" The most charming and fastastic feature in this little volume, with its right dainty title-page, is the exuberance, and, sooth to say, the appositeness of the different songs chaunted round the ingle in Torksey Hall. Thomas Cooper's heart seems brimming over with this spontaneou poetry. The book altogether is an original; it is just suited for the winter's fireside, over a posset and cures." -Sun-

"Let Cooper throw away his Chartist notions-and what has a poet to do with rude questions of politics, of Charters, and political faiths, creeds, and the like ?- and one of England's greatest and truest-hearted poets. The man who can write such exquisitegems as this little volume abounds with, may, and he will, carve out for himself a name as enduring as the language in which he pens the this is the best Christmas book we have yet seen."-Leicester ( Tory ) Journal.

"We are haven to meet Mr. Cooper in this light department of portical labour, and to find that his muse can for a while lay aside her sternness, and, ceasing to brood o'er human wrongs, can yield to the impulses of the season, and sympathise with the kindlier emotions of social fesefforts of the author were imbued with true poetic feeling. A clever fellow is our Thomas, the Chartist, full of rough common sense, and as much imagination as could possibly fud room in a head so crammed with the hard which, although at times uncouth enough, is written with a heartiness that forms a pleasant relief to the sung of the moon and stars above, and the streams with the flowers below, till ordinary folks are sick and tired of hearing of them. "Not having seen the ' Prison Rhyme,' nor any of the poetic effusions of Mr. Cooper, we certainly were not prepared to find from his pen poetry of so high an order as the volume before us contains. The author of 'The Wise Saws' has written a Chrismas Rhyme, which bids fair to compete successfully with the best productions of Byron or Shelley, and which, without any great exaggeration, might be compared to the hitherto unequalled verse of John Milton. conceal their hatred of justice. We know what this language means. The Cracow manifesto proclaimed the abolition of all privileges, universal citizenship, But who are the men that compose this "Polish Committee?" Do they really represent the Polish emigrants residing in England ? Not at all. They are

but a faction and a fraction of the Polish emigration. They are the King-Adamites, or partisans of Prince CZARTORYSKI, who wish to impose a king on Poland They are but a fraction of the emigration, both in France and England, and their sentiments are abhorred by the great mass of the emigrant Poles who are democrats. But if so, it may be asked, Why have not the democratic Poles replied to the counterrevolutionary address of the "Polish Committee ?" Because, under present circumstances, such a reply would have a bad effect; it would exhibit disunion people, substituting the rule of the Many for the amongst the Poles themselves, which would be fatal to their cause. We, therefore, think that the Polish democrats have acted wisely and discreetly in abstaining at present from protesting against the sentiments of the five aristocrats calling themselves the "Polish Committee."

A few words more to the King-Adamites, and we have done with them. That they, a small minority of the emigration absent from Poland, should go through the farce of electing a king for their countrymen, is the "wildest theory" of government we ever heard tell of. We saw recently that Prince CZARcountry acquiesce in the propriety of the war, but TORYSKI had abdicated his pretensions to the throne of Poland. In so doing he acted discreetly, and we advise his partisans not to attempt to induce just, and moderate character, which would secure their chief to resume the pretensions he has laid the sympathy and approbation of every state in Euaside. We said at the commencement of this article, that we did not despair of the success, even of the present strugglo. That the Russian, Austrian, and Prussian Despotisms are conspiring to prevent Western Europe being informed of the facts of the struggle is very evident. The German papers publish only the news supplied to them by the government officials, under the icalous supervision of the censorship. The Prussians and Austrians have established a double line of troops along the whole of the frontiers, so that the news-gatherers for the French and English journals can learn little or nothing of what is passing. One thing is certain, that a large body of the patriots have entrenched themselves in the defiles of the Carpathian mountains ; they are said to number three thousand, but it is probable that they are at least double that number. In the Carpathian mountains they are in communication with Gallicia on the one side, and Hungary on the other, in both of which

AMERICA .-- No news is as bad as bad news for the Stock Exchange; and, there being no news from America, consols are still going down.

INDIAN CORN.

The importation of Indian Corn, which is going on both in England and Ireland, will prove of little service in alleviating the wants of the poor, unless they be informed of the best methods of preparing it for food. This information it is now in our power to afford ; the following

receipts having been kindly forwarded to us from North America. Indian corn when ground makes excellent gruel, prepared in the same way as oatzieal gruel; and what is called mush, is the same thing as Lancashire oatmeal porridge; but it is necessary in making this, that it be very well boiled. In summer it is caten cold and is very much liked. Treacle may be eaten with this. Indian meal is considered a great improvement either in white or brown bread ; about one third of Indian meal should be mixed with wheaten flour ; this is especially advantageous

in case of the flour being damaged by wet. Indian bread is excellent, and is made thus :- To a quart of sour milk, or buttermilk, as much corn meal should be added as will make it into a thisk batter ; a. little salt, and a teaspoonful of carbonate of soda dissolved in water, acts upon the acid of the buttermilk. and the effervescence causes the bread to be light; a spoonful of course sugar is an improvement, as is also a little butter or melted lard. This must be baked in well. greased tins, sufficiently large to allow the cakes to be about an inch thick ithey must be baked in a quick oven. They are best eaten hot, but are very good cold. Treacle. is excellent with these. When sour milk cannot be procured, fresh milk may be substituted, adding a table spoonful of vinegar ; but the carbonate of soda must not be stirred in until just before putting into the oven. Another way of making this bread is to your boiling sweet

What is called Indian Slap Jack would be vory available in those parts of Great Britain where girdle cakes and. bread of that description is used. They are very excellent and are thus made :-Scald a quart of Indian. meal ; when lukewarm add a few spoonfuls of wheaten. flour, half a ten-cup full sf yeast, and a little salt, and when sufficiently risen bake them on a well-greased bakestone. They are best eaten.hot. Another way, and the most approved here, is to mix about half the meal into boiling milk and water ; when cool, stir in the remainder of the meal so as to make a thick batter, mixing in twoor three spoonfuls of flour, three eggs, and two tea-spoonfuls of salt.

To make Johnsky Cakis :-- Scald a quart of Indian meal with a sufficient quantity of water to make it into a thick batter ; stir in two or three spoonfuls of salt ; mould it in the hand into small cakes, rubbing a good deal of flour in the hand, to prevent them sticking. These cakes are fried in lard ; when browned on. one side, turn Eat them hot with treacle.

To make Hoe Cates :- Scald a quart of Indian meal with a pint of water, enough to make a thick batter: stir in two tea-spoonfuls of salt, and a small quantity of butter melted ; put it in a well-greased tin, and bake it half an

This is the latest arrival from that quarter; and to Captain Sheddings, the commander of the vessel, we are indebted for the Cape of Good Hope telligence of the loss of the Francis Spaight :-

"During the night between Tuesday and Wednesday last, it blew a violent gale from the northward, and at six, A.M., on Wednesday, the squalls were very severe.

"At eight o'clock, on the 30th, the wind came more to the westward, in a hard squall, accompanied with torrents of rain, when the barque Francis Spaight, of 366 tons, from Manilla to London, was observed driving towards the strand, and an attempt was unfortunately made to set the mainsail, which brought the vessel's broadside to the shore ; and in this position, with the mainsail aback, she continued to drive until she struck the ground near the slave lodge, about a mile from the village of Papendorp, when, in consequence of being broadside to the beach, she rolled heavily, the sea occasionally breaking over her decks. A whale boat and a surf boat were sent from Cape Town. The whale boat succeeded in getting alongside the barque, and a line was thrown over the vessel by the rocket apparatus. The moment the boat touched the side, the crew of the barque, who appeared to have lost all presence of mind, rushed into her, when she was filled and capsized, and, sad to relate, the captain and fourteen men of the crew were drowned, together with four men of the boat's crew, named Thomas Williams, William Taylor, John Jackson, and Charles Norton. " A surf boat and another boat were also sent from the North Wharf, by Messrs. T. and J. Sinclair ; both boats capsized, and two men, named Dollie and Peter, were drowned.

"The following are the names of the crew saved viz. :- James Robertson, carpenter, and John Mc Leod, seaman.

"Captain Patterson and the following men were drowned, viz. :- Thomas Haydon, mate ; Magnus Smith, second mate ; Henry Hiate, steward ; David Evans, Edward Mc Donald, George Hutchings, John "It is exactly twenty-five years since a northerly gale occurred in Table Bay during the summer months ; and on reference to the Government Gazette week an advance of 1s. per quarter has been obtained of the year 1821, we find that on the 4th of January a northerly gale, therein designated a hurricane, blew with great violence, when the Danish ship India at rather under last week's currency. Ayes ... ... ... ... 44 The reduction was therefore affirmed.

On the proposition for reducing the duties on the importation of foreign silk manufactures, which embraces several items in the tariff.

Mr. G. BANKES proposed to omit this article, with all its items, from the tariff. He accepted the challenge of Sir R. Peel to show that the remission of duties had ever produced depression among the operatives of any trade to which such remission had been applied. Within a few years after the intro-duction of Mr. Huskisson's measure, a select committee had been appointed by the house to examine into the state of the silk trade at that time, and to inquire whether any and what legislative measure could be passed to promote it. The hon. member then read extracts from evidence taken by the committee, showing the reduction in wages in consequence of the introduction of the goods of France. The poor rates of a parish in Coventry increased from £1307 in 1824, to £2192 in 1830. Mr. Brocklehurst, of Macclesfield, stated that in 1824 there were 276,000 spindles in that town, and that the mill people enthere were 159,000 spindles, and the mill people had been reduced to 5254. In 1831 the spindles were sions of indignation, contempt, and of anger, the impassioned and eloquent imprecations which he has in Macelestield were 18s. per week; in 1828, 8s. 6d.; inspired ! He would then be able to say whether a and in 1831, were 4s. 7d.; and the wages of the gross expenditure of £4201; in 1829, of £8670; more than double. (Hear, hear.) The number of honourable baronet. The great manufacturers and capitalists might proclaim that they were ready to make sacrifices, and take a share in the triumph of passing the present measure; but this was the case of the labourer and the operative, and it was to ruin them. were 204 cotton mills; in 1845, 263; showing an increase of 59. In the former period there were 566 wool manufactories; in the latter 655; the increase crease of 6; but at the former period there were 69 silk mills, while in 1845 there were only 63—a reduction of 6. According to the information he had received, some two or three of the larger houses employed about CORN AND CUSTOMS' IMPORTATION ACTS. 150 persons in the height of the London season, after which these individuals were sent about their business. But what was the number of persons employed in the silk trade? There were 58,200 persons so employed, besides 6800 ribbon weavers, and 38,000 other weavers not particularly distinguished, but no doubt a very large portion of them were employed in the silk manufacture. There was another article connected with the trade, called figured gauze. The member for Leicester (Mr. W. Coventry had been already driven from this branch of trade. The figured gauzes were worth 180s. per lb. The silk of which they were made was purchased at 28s. per lb. So that the difference between 180s. and 28s., being no less than 150s. per lb., was expended in labour and profit. By French competition, the opposed, the reduction. gaged in the trade were 10,000. In 1828, two years for there were only two houses that now manutrade in gauze ribbons had been driven out of Coventry, after the completion of the alteration of the duty, factured any. The duty under which the French morality of the country would be equally inviolate: competition had had this effect, was 27s. 6d., and it those gentlemen, who called on him yesterday, say with regard to wages-why that they were reduced twenty per cent. since 1826. He (Lord G. Bentinck) did not apprehend that the manufacturers could grind them down any further. (Hear, and cheers.) In order to enable them to compete with foreigners they had dragged the weavers from the loems which they worked at home to place them in mills and factories, and had reduced wages to the lowest possible point. It was clear, therefore, that unless it was intended to destroy the trade of Coventry altogether, this reduction ought not to take place. He would not go to Maccle field, the hon. member for that borough patriotism, but showed slight sympathy with the hon. was a witness to the consequences of free-trade in silk. He mentioned as a striking and singular fact, that a gentleman, with whom he was acquainted, had lent to the silk manufacturers, in small sums, £30,000, and that he had in consequence of their distress become the reluctant proprietor of mills mill, which had cost £14,000, his friend had obtained for £1,700. Was that a proof of the prosperity of the silk trade ? Nay more, was it a proot of the perfect success of the free trade system? Referring to that item of the silk duties which reduces the duty paid on the importation of foreign silk dresses from starvation, because they could not come to the house salted, pork fresh, pork salted, &c." and knock loudly at its doors? He implored the

house not to consent to a measure which would inflict ruin on so many thousands of individuals.

Sir R. PEEL hoped that those who were now called upon to decide upon the scheme of commercial policy would maturely consider the facts within their reach, before they came to a conclusion upon; it on the mere impulse of feeling. He contended that it would not be for the interest nor for the morality of the working classes to recur to that prohibitory system, because, as he showed by reference to what occurred in Spitalfields in 1896, 1812, and 1816, there were periodically sufferings among the operatives in the silk trade, which it was impossible to parallel by anything which had occurred since the relaxation of the prohibitory and protective duties. Upon the order of the day (the further proceeding, on the Customs' and Corn Importation Report) being read, a tedious conversation ensued upon the already well-debated article of silk.

Mr. MUNTZ followed the example by reverting to the zine question.

At the item spirits and strong waters, Alderman THOMPSON offered his protest to the proposed reduction in duty as inexpedient, as well on considerations of revenue as on other grounds. The annual loss to Ellis) was compelled to admit that the weavers of the revenue from this course would be upwards of £400,000, while the advantage, if any, would result exclusively to middle and upper classes of the community. He moved the omission of the above words from the resolution.

Mr. Ewart supported, and the Marquis of Granby

Mr. CARDWELL argued that the revenue would not be injured by the diminished rate of duty, while the consumption would not be increased-but illicit diswas now proposed to reduce it to 14s., when Coventry could not remit it under a duty of 27s. 6d. gentleman's approhensions.

This objection was not pressed to a division. On the next resolution being read,

Mr. MILES regretted that ministers had determined to remit the small duty which had been, retained in the tariff of 1842, on the importation of fowhich only five years before cost £120,000. One reign cattle. He showed that the duty had neither been prohibitory nor unproductive ; and if the supply of foreign beasts for the market as Smithfield had been recently stopped, it was owing to the reluctance of the importers to introduce any forsign cattle until the present duty was repealed. When that duty was taken off, the market would be quite "inundated" £2 10s. to £1 10s., he reminded the house that this with foreign cattle. He thought that the duty ought reduction would have a most injurious effect on the to be retained until the expiration of the Corn Laws ; milliners and dressmakers of England, who amounted and such being his opinion, he moved, as an amendin number to 106,000 persons. Would the house ment, to strike out of the resolution the words, "oxen leave these women to starve, or to a fate worse than and bulls, cows, lambs, swine and hogs, bacon, beef

Colouel SIBTHORP seconded the amendment. Sir R. PREL justified the reduction of duty now proposed, and showed that it could not be productive of any injury to the agricultural interest. Competition with Irish cattle was quite as formidable to the English grazier as competition with Dutch and Danish cattle. And yet the English grazier com-peted successfully with the Lish grazier. Why, then, should he be afraid of comparing with the foreigner ? It was said that the price of cattle had recently increased. Now, did it never occur to the P. otectionists that the increased price might be occasioned by increased consumption, and that increased consumption might be the result of the labouring classes having enjoyed, during the last year, better wages and more constant employment ?

A discussion then took place, in which Mr. Finch.

The house met at twelve o'clock.

FEVER (IRELAND) BILL.

On the order of the day for the house going into committee on the Fever (Ireland) Bill being read,

Mr. P. SCROPE rose to move, pursuant to his notice, an instruction to the said committee, "That the guardians of the several Poor-law Unions in Ireland be required to relieve with food all such destitute persons within their unions as may be in danger of verishing from want, or from disease, the consequence of want." He called the attention of government to the present state of the Poor-law in Ireland, with the landlords of Ireland, the Duke of Devonshire, Lord view to its adaptation to the pressing exigencies of the Irish peasantry. However much it was to be hoped that the measures which had been devised for the relief of this distress would be sufficient, still there were various circumstances now occurring in the sister kingdom justly calculated to excite very great alarm. The extensive exportation of Irish Home Secretary, an avowal which he trusted would grain to this country could not be carried on without detriment to the population from whose resources it was almost made in the precise terms used so often was withdrawn. Another dreadful incident was the on his own side, namely, that the time was come when wholesale system of evicting tenantry from their the government must make up its mind to legislate holdings, now prevailing in Ireland. The relief upon Irish subjects with Irish feelings. (Hear, afforded by the union workhouses was altogether in- hear.) He hoped and he believed that the expresadequate for this wide-spread distress. It was re-guisite, therefore, that government should promote ment constituted a new era for Ireland. (Hear.) the employment of the able-bodied poor by some such undertaking as the recovery of the waste lands in Ireland.

Mr. S. CRAWFORD seconded the motion. He in-sisted that, though some of the Irish landowners might voluntarily discharge their duty towards the peasantry, yet a compulsory measure of poor-law relief was needed to render that assistance general.

Sir J. GRAHAM explained that the object of the Bill before the house was merely of a temporary nature. it being only intended to afford relief from the fever at present raging in Ireland. The proposition submitted by Mr. Scrope could not be entertained without opening up the entire question of Poor Law conef in that country : it ought, therefore, either to be reserved until Lord J. Russel's motion on the state of Ireland came before the house, or else to have been framed into a substantive measure. It was a been framed into a substantive measure. It was a Sir JAMES GRAHAM applied for leave to bring in a mistake to suppose that the law at present enforced bill to authorise the establishment of fever hospitals no relief for the poor in Ireland. It was considered, in Ireland. One provision of the measure was to doing? We ask, what will you do? Eternal inhowever, that the existing law was unequal to the constitute a board of health, consisting of not more famy would be our deserts if we longer remain paspresent emergency, and hence the measure before the than five members, who should sit in Dublin. It was sive spectators of this glorious struggle. Our object present emergency, and hence the measure before the house had been introduced by government. He then recapitulated the different provisions of the Bill. A legislative restraint upon the exportation of Irish however, could not be adopted, without increasing ferent boards of guardians to provide buildings, with pressed. Poland, in her present perileus position, rather than diminishing the distress sought to be medical and other comforts, for the sick in their re- having three of the strongest military governments relieved. Parliament had already voted nearly half amillion sterling to promote employment in Ireland. Nevertheless, government were disposed to listen to until September, 1847, though the Lord Licutenant important to adapt the measures they had recom-mended to the peculiarities of the Irish law, as well as with an especial reference to the feeling of the Irish people. For these reasons they had thought it unwise to adopt, as the foundation of their measures, the tests that had been incorporated in the English Poor Law from the period of its first establishment, in the reign of Queen Elizabeth. It would be unwise to pass a measure of the kind suggested by Mr. S. Crawford, as the inevitable effect of such an enactment would be the introduction of a torrent of pauperism, which would be dangerous to the owners of property, as well as most prejudical to the interests of all classes of the Irish community. It was better to provide for a temporary emergency, such as that now at hand, by measures such as those which had been submitted by government to that house. These measures, he emphatically declared, were given not at all in the way of dole, but in accordauce with the demands of right and justice, and only as a fair equivalent for the contributions paid by the Irish people into the national exchequer. Mr. W. SMITH O'BRIEN considered that, as the present measure would override many provisions of the existing Poor Law in Ireland, specified complaints of the mal-administration of that law ought to have been preferred to Parliament with a view to justify the passing of the proposed enactment. He objected also to the extended means of local taxation, as well as to the increased power which would be conferred upon the Irish executive by this bill. The commercial projects of government, there was reason to believe, would materially benefit Ireland by augmentin the value of her exports. Government might effect still more for the relief of the Irish people by raising a tax upon absentee landlords, and by the advance of loans for the furtherance of railway schemes, now standing still for want of capital, Mr. WAKLEY insi-ted upon the superior utility of a Poor Law in Ireland to compel the Irish landlords to fulfil their natural obligations by affording relief reading of the Corn Importation Bill on Tuesday to their starving fellow-countrymen. The present next. state of the law was a robbery on the English labourer. Many thousands of Irish labourers (and he and the house adjourned. did not blame them, he wished they would all come came into this country at the commencement of the harvest and obtained work. They remained about two months, and then returned to Ireland with the proceeds of their industry in their pockets. Was it iand :--fair, that just when the English labourer hoped that To the Right Honeurable Sir Robert Peel, Bart., First consider the case of the patriots more hopeful than to the Right Honeurable Sir Robert Peel, Bart., First consider the case of the patriots more hopeful than ever. In the course of it, Sir J. Graham said, if that the rowal morey was unlimited, but that unfor labour, and that the time had arrived when he might hope to lay by something for the winter, thousands of men from a foreign country-(laughter, and "hear, hear," from the Irish members),-yes, the labourers were foreigners to them, and thousands of them came and beat down his wages by increased competition, and so frustrated all his hopes. Sir J. Graham had proposed a fever bill, which he said was of very limited operation, but it was too evident that the evil was of a most extensive and lamentable character. He (Mr. Wakley) knew it would be alleged that the workhouses in Irelaud were not full; countries, to check and no wonder, the poor might as well starve out of While your memori the houses as in them. (Cries of "Oh, oh !" and highly satisfied with the moderation of the British govern- Many of the liberal members gave our cause their op-"hear, hear.") He could not understand the Irish ment in offering terms so just, and, in the event of their position, a circumstance which must net be forgotten character, for he found the Irish gentlemen whom he having been adopted, calculated to have brought the for them. Many others, including Mr. O'Connell, had met to be a hospitable and hilarious set of men; matter of dispute to a peaceful termination, yet your who had promised his support, left the House a few fellow-countrymen? The highest cost of maintaining an Irish pauper ina workhouse was 2s. per week ; and in many of the returns the cost of food, clothing, and necessaries, was stated to amount to 1s. 4d., 1s. 5d., 1s. Sd., and 1s. 9d. per head per week. (Hear, hear.) In one case he observed the clothes were stated to cost one penny per week. (llear. hear.) For what condition must a many he in who would go to use of these nam be in who would go to one of those places, where his provisions, clothes, &c., would cost upon an average but 1s. 9d. a week? (Hear, hear.) After referring to a pamphlet published by Dr. Corrigan, to shew that disease and death would be as extensive as it was in 1817, unless immediate preven-tive measures were adopted, and quoting the statistics of the epidemic at that period, Mr. Wakley said :- It was stated, but it was a liber to state, that the Irish people were in a state of destitution, bewere idle and lazy. A greater falsehood with regard to any people or nation was never uttered. (Hear, hear.) A fouler calumny was never circulated against any community. (Ilear, hear.) What did they witness in London? It was a fact worthy of notice. It was well known that the severest labour performed in London was that performed by the bricklayers' labourers ; it was in his (Mr. Wakley's) opinion the severe-t labour performed in England. By whom was that labour performed ? By Irishmen almost to a man. (llear.) Ile believed there were 20,000 bricklayers' labsurers in London and its suburbs, and there were not probably 100 Englishmen amongst the 20,000. A subscription was subscquently 9s. or 10s. a week did not come and seek for the made to relieve the immediate wants of the poorer work at which he could earn double the money. They shrunk from the work, which was cheerfully undertaken by the Irish labourer, and which, in fact, the English labourer was incapable of performing. (Hear, hear.) That showed min that no man was more willing to work than the Irishman, if he had the opportunity, and whathe(Mr. Wakley)desired was her four sons, and as many daughters, the spot that he should have the opportunity. # THE NORTHERN STAR.

FRIENDS,-The cause of liberty in eastern Europe more in arms, resolved to exterminate the murit will fill the mind of every democrat with glad ex-pectancy that the empires of despots are about to receive a shock ; and that the bravery of Poland, after many years of excruciating misrule, is on the eve of being rewarded with that inestimable blessing which is the basis of all others-LIBERTY.

Poland is in arms! to extirpate the power of the three stupendous despotisms under which she writhes. Brave, unsubduable land ! The odds against her are fearful, but the victory is not always to the strong. That the wisdom of her councils and the valour of Capt. OSBORNE said, the foundation of all measures her deeds may secure her speedy triumph, should be fate of her focs a terror to all tyrants, should be the fervent orison of every patriot throughout the globe.

Let the cold moralist, who, when all things are in a Sal state of quietude around him, deprecates the employment of physical force under any circumstances. E contemplate the state of Poland for the last fifteen years, and say whether he is not amazed that human Dit nature could remain so long passive under so many Do. aggravated provocations to resistance ? Behold female Mr. honour sacrificed 'to the concupiscent brutality of armed slaves ; see the dungeons filled with those whose virtue rendered them obnoxious to tyranny; the Pri friends of freedom writhing under the tortures of the murderous knout; the bolde t and bravest, with myriads of little children, forced to pine away life in the dreary regions of Siberia; a religion proscribed; the Pos national language forbidden; and the expression of Boo epinion interdicted! We say, let the moral philoso- Sta pher contemplate Poland thus circumstanced, and Mo. hard must be his heart, and icy his soul, if heapplaud Me not this development of her spirit of resistance, or hope not her speedy triumph over her brutal and We ruthless foes.

Ex Friends, the success of the Polish struggle must redound to the weal of the democratic movement, not only in our own country, but throughout the civilised world. The achievement of liberty by Poland would act like an electric shock upon the torpid na-DE tions of king-cursed Europe. It would afford a lesson to mankind replete with invaluable instruc-Τo tion, the moral of which would be, "Go and do like-wise." It would arouse the world from its criminal lethargy, for there is a national as well as an individual spirit of emulation, which is stimulated to activity by brilliant national triumphs. Every nation from democratic America, down to our poor starved, Total insulted, and degraded neighbour Ireland, is deeply Tota interested in the issue of the Polish movement. We have beheld with pleasure that in France and Germany the current of public feeling flows favour-ably. They have evinced their sympathy for Polish patriotism-their antipathy to the arrogant assumptions of the spirit of despotism. Nevertheless the poorest among us can give some-thing, and where is the Chartist that will refuse his mite for so holy a purpose as to free the limbs of our Polish brethren from the galling manacles of ruthless despotism ?
